Homework and Classroom structure - Students will have a minimum amount of homework as I believe in quality not quantity and only assign homework that reiterates what is being taught in the classroom.

I strive to help each student progress academically and therefore I use various learning style techniques in my classes. In every class, I utilize Power Point Lecture Slides (which are emailed to the students weekly) this gives the students the opportunity to take notes and weekly class discussions also help students learn and I encourage all my students to participate. I also utilize short videos to help emphasize what is being taught. My goal is for my students to be active learners in my classroom.

I believe each individual is God's masterpiece fearfully and wonderfully made in His image and every student will be encouraged and edified in the classroom.

This class will combine CLEP Sociology and Ethics using both books simultaneously throughout the 1st and 2nd semester

In Sociology, A Christian Approach for Changing the World, respected Christian sociologists from across North America share their insights into the sociological perspective, establishing a framework from which to critically analyze the current state of the world. Students who have been well trained in sociology know how to think critically about human social life, and how to ask important research questions. Students trained in sociology also know how to help others understand the way the social world works and how it might be changed for the better. Most generally, they have learned how to think, evaluate, and communicate clearly, creatively, and effectively. These are all abilities of tremendous value in a wide variety of vocational callings and professions.

Sociology is the study of human social relationships and institutions. Sociology's subject matter is diverse, ranging from crime to religion, from the family to the state, from the divisions of race and social class to the shared beliefs of a common culture, and from social stability to radical change in whole societies. Unifying the study of these diverse subjects of study is sociology's purpose of understanding how human action and consciousness both shape and are shaped by surrounding cultural and social structures. Sociology is an exciting and illuminating field of study that analyzes and explains important matters in our personal lives, our communities, and the world. At the personal level, sociology investigates the social causes and consequences of such things as romantic love, racial and gender identity, family conflict, deviant behavior, aging, and religious faith. At the societal level, sociology examines and explains matters like crime and law, poverty and wealth, prejudice and discrimination, schools and education, business firms, urban community, and social movements. At the global level, sociology studies such phenomena as population growth and migration, war and peace, and economic development

Christian Ethics - Moral Choices textbook has earned its place as the standard text for college ethics courses. Offers extensive updates, revisions, and brand new material, all designed to help students develop a sound and current basis for making ethical decisions in today's complex postmodern culture. Moral Choices outlines the distinctive elements of Christian ethics while avoiding undue dogmatism. The book also introduces other ethical systems and their key historical proponents, including Plato, Aristotle, Augustine, Thomas Aquinas, and Immanuel Kant. After describing a seven-step procedure for tackling ethical dilemmas, author Scott Rae uses case studies to address some of today's most pressing social issues. He guides students in thinking critically and biblically about: ? Abortion ? Reproductive Technologies ? Euthanasia ? Capital Punishment ? Sexual Ethics ? The Morality of War ? Genetic Technologies and Human Cloning ?

Students will be using the Bible and thinking critically about the important topics that permeate our society. The textbook uses scripture throughout - through classroom discussion and lectures students will grow academically and spiritually as they are encouraged to seek God first and foremost as we study every topic.

CLEP American Government & Economics (Macro) Class

Timothy 2:1-2 - I urge, then, first of all, that petitions, prayers, intercession and thanksgiving be made for all people—for kings and all those in authority, that we may live peaceful and quiet lives in all godliness and holiness.

In addition to the textbooks, I will be giving weekly lectures and adding to the information in their textbooks for American Government and Economics covering all the information required for both the CLEP American Government Test and the CLEP Macroeconomics Test - upon completing the class students will be prepared to take these tests and passing them will obtain college credit. I also use visuals such as videos to impact the various topics studied and to reinforce what is being taught in the book and in weekly lectures. American Government opens with an inspiring look at the blessings we enjoy as American citizens and the symbols we hold dear, then proceeds to a fascinating study of the Constitution, the government it established, and the rights and privileges it guarantees the American people. After studying the Constitution and the national government, students learn about federalism and government at the state and local levels. The text concludes with a chapter on the opportunities and responsibilities of American citizens to get involved in their unique political system. We will be doing a Mock Jury in class when studying the Judicial System, using the Constitution to decide various court outcomes, analyzing the Bill of Rights, and focusing on the 2020 Presidential Candidates and their platforms. Understanding the Electoral College and popular votes.

Books needed for the class please be sure it is this edition below

In Economics we will focus on free enterprise capitalism in a free market economy. After learning the biblical views of work, wealth, and stewardship, students can understand the proper economic roles of individual producers and consumers, as well as the role of the firm from a conservative, Christian perspective. The stark contrast between the market economy—the cornerstone of prosperity in the United States—and the command economy—the hallmark of fiscal failure in Communist countries—is graphically presented. Essential concepts such as competition in the marketplace and private ownership of capital are discussed from a conservative perspective. Students will be learning about starting a business, creating their own business on paper, advertising, the impact of the media for businesses, creating their own commercials and slogans for companies, looking at competitors in the market place and businesses

that have been successful and those that have failed. And lots more

Furthermore, focusing on the CLEP Macroeconomics topics

Dear Parents and Students,

I wanted to take this opportunity to thank you for prayerfully considering my classes for the 2019 - 2020 school year.

Your son/ daughter's education is vitally important and I feel so incredibly honored that you have taken the time to consider my classes. If you have any questions about any of the classes, please do not hesitate to contact me. I am more than happy to answer your questions and/ or provide more information.

Since I began teaching my classes over ten years ago, my focus has always been to glorify God and make Him the focus of all my classes. I begin every class with prayer, asking Him to lead and guide us and to provide me with the wisdom and knowledge to help each and student reach their full potential academically and to continue to grow spiritually. We praise the Lord and give Him thanks for our time together asking Him to help us all glorify Him in our words and actions. All my classes are taught from a Christian/ Biblical Perspective and although there are different Christian denominations, there are Core Christian Beliefs that we all believe. Please take a moment to read them and share them with your son or daughter if you decide to enroll. Parents, I want you to feel confident and at peace knowing that the beliefs you are teaching your son and daughter at home are also being reinforced and emphasized in my classroom every week.

Teaching is my passion; I put my heart and soul into all my classes. I find so much joy working with my students every week and look forward to each and every class. For all my classes, I will be utilizing lectures as part of the class. However, I know some students are not proficient in note taking and therefore I send the PowerPoint lecture notes to all the students and parents via email. I utilize the various learning styles of all students - visual, auditory, and the use of discussion in the classroom each week. Students therefore have an active part in learning the material.

To conclude, I thank God for the opportunity to have taught such amazing students over the years and I look forward to another school year next year. Once again, if you have any questions about the classes, please feel free to contact me. I will happily discuss and/ or answer any questions you may have as you prayerfully plan for next year.
